Mechanical Design Labs

Autodesk Certified Professional (ACP) for Revit Mechanical Design | TGS-2023036661 | v7.0

- Lab 01: Establish MEP project and link architecture
- Lab 02: Place equipment and air terminals
- Lab 03: Build and size a duct system
- Lab 04: Create mechanical views and templates
- Lab 05: Schedule equipment ducts and pipes
- Lab 06: Issue sheets tags and revisions
- Lab 07: Build an equipment family
- Lab 08: Configure HVAC and pipe connectors
- Lab 09: Flex test parameters and annotation
- Lab 10: Create spaces zones and energy model
- Lab 11: Review airflow loads and duct sizing
- Lab 12: Build hydronic piping and check pressure
- Lab 13: Link and coordinate discipline models
- Lab 14: Resolve clashes and evaluate options
- Lab 15: Export and defend the mechanical package
